PROFESSIONAL SUMMARY

Full Stack Web and Mobile Developer with 5+ years of experience turning ideas into scalable, production-ready products across fintech, media, agriculture, marketplace, and business platforms. Based in Jamaica and open to remote overseas opportunities, with a strong track record of shipping independently and collaborating with distributed teams. Deep expertise in backend architecture, REST API design, payment systems, database design, authentication, and full-stack product delivery. Builds secure, reliable systems with React, Next.js, React Native, Node.js, NestJS, MongoDB, Stripe, SendGrid, JWT authentication, and role-based access control. Proven ability to guide projects from requirements through development, testing, deployment, and maintenance with a focus on clean architecture, reliability, and measurable business impact.

EDUCATION

University of the West Indies, Mona - Materials Science - Bachelor of Science Computer Science Minor	September 2017 - July 2021
---	-----------------------------------

EXPERIENCE

Full Stack Engineer

Wealth Building Investments - Architected and developed a full-stack fintech platform supporting 100+ users, including a customer-facing application, admin portal, and backend API layer. - Engineered a fault-tolerant scheduling engine that automated payment runs, retried failed transactions, and synchronized with Stripe, reducing manual intervention by ~40%. - Implemented secure payment workflows that cut duplicate-transaction risk by ~30% and improved consistency across balances, transactions, and payment records. - Built core financial modules covering balances, transaction tracking, loan repayments, savings contributions, payouts, and payment history across 6+ workflows. - Built backend services with NestJS, Node.js, MongoDB, Mongoose, JWT authentication, and role-based access control for 100+ active users. - Created React/Next.js interfaces for admin and customer workflows, streamlining 8+ key screens with responsive, usability-focused design. - Led the delivery lifecycle from requirements and technical planning through testing and deployment readiness, shortening turnaround by ~25%.	January 2025 - Present	Remote
---	-------------------------------	---------------

Full Stack Developer

1Dev.ai Software Solutions (formerly Cenedex Software Solutions) - Built full-stack web applications with React, Node.js, REST APIs, and database-backed services across 6+ client and internal projects. - Created responsive frontend interfaces that improved usability and performance across 10+ feature screens for web and mobile users. - Architected and implemented RESTful APIs supporting authentication, business logic, and frontend-backend data flow across 5+ applications. - Designed database schemas and managed application data for CRUD-heavy features, improving data integrity and consistency across 4+ systems. - Collaborated with designers, developers, and stakeholders to deliver production-ready features on schedule for 5+ client engagements. - Debugged issues, reviewed code, and tested features to improve application quality and reduce production defects by ~20%.	September 2022 - Present
---	---------------------------------

PROJECTS

Wealth Building Investments Platform

- Built a full-stack fintech platform for 100+ users with customer and admin apps, backend APIs, automated payments, and Stripe/SendGrid integrations.

TakingFlight Media Platform

- Built a media streaming platform serving ~500 users with video playback, playlists, recommendations, admin tools, and content delivery workflows.

Travaguz Travel Listing Platform

- Built a Caribbean resort listing platform with property discovery and email-based booking inquiries across 20+ listing-ready pages.

Agriculture / Marketplace Platform Planning

- Planned architecture and business rules for a Jamaica-first agricultural marketplace with buyer requests, seller listings, orders, and admin oversight.

SKILLS

Frontend: React, Next.js, Material UI, Redux Toolkit, RTK Query, HTML, CSS, JavaScript, TypeScript

Mobile Development: React Native, Expo

Backend: Node.js, NestJS, Express.js, REST APIs, API Design, Authentication, Authorization

Database: MongoDB, Mongoose, Database Schema Design, Data Modeling, Data Integrity

Payments & Integrations: Stripe, Stripe Webhooks, SendGrid, Third-Party API Integration

Security & Access Control: JWT Authentication, Role-Based Access Control, Secure Payment Workflows

Deployment & Infrastructure: Vercel, Railway, MongoDB Atlas, AWS S3, Environment Configuration

Tools & Workflow: Git, Bitbucket, Postman, Swagger, Code Reviews, Debugging, Agile Collaboration
